ANALYSES ET SURFACE

BUSINESS SECTOR

ANALYSES ET SURFACE is a materials expertise laboratory.

The laboratory offers services in expertise, testing and materials analysis on finished products in the aeronautics, space, naval and defense industries. Its resources allow the study of products composed of all types of materials (metal, plastic, mineral, composite, additive manufacturing).

It also carries out validation tests according to the standards in force.

- Characterization of materials and surfaces
- Chemical analysis
- Analysis of particles and nanoparticles
- Analysis of elementary impurities and heavy metals
- Failure assessments
- Expertise in metallurgy and heat treatment
- Aging of materials
- Research and Innovation Projects

Through the expertise of the 6NAPSE Group, it also offers:

- Environmental tests (climatic, corrosion, susceptibility to fluids, sealing, EMC)
- Mechanical tests
- Vibration tests
- Power electronics
- Numerical simulation
- Acoustic and vibration analysis
- Professional training

CERTIFICATIONS

ISO9001, COFRAC Essais ISO 17025, CII/CIR, CRT ANALYSES ET SURFACE est une structure du GROUPE 6NAPSE. Le Groupe permet aux industriels de disposer de compétences en ingénierie avec des services adaptés à l'industrie de production
