BUSINESS SECTOR

With over 70 years' experience, Electropoli is a major player in metal surface treatment in Europe.

A team of over 1,500 employees operates around its 6 plants in Europe, protecting and embellishing metals in a wide range of sectors (Automotive, Aerospace, Defense...).

Thanks to its high production capacity and rapid industrialization, Electropoli offers a wide range of processes for protecting metal substrates such as steel, cast iron, aluminum and magnesium.

Its strength lies in its ability to innovate and take charge of its customers' projects in their entirety, from the expression of needs to the delivery of components, supported by a European industrial network. Its constant quest for excellence, innovation and employability is in line with its commitment to the environment.

In its in-house R&D center, employees work on innovative solutions to meet the current and future challenges of new trends and contribute to a sustainable future.

- ZINC NICKEL 12/15% DIPSOL for THR steels
- CHEMICAL NICKEL and Nickel PTFE Improved sliding coefficient
- SURTEC 650 Conversion on aluminum
- PCS 2500/2530 liquid paint and anti-slip application
- Passivation on stainless steel, decontamination
- Multi-metal cataphoresis (steel, aluminum, magnesium)
- Zinc plating
- Alodine 160
- Phosphating
- Sandblasting cabinet | Degassing chamber | Tribofinishing
