⚙️ BUSINESS SECTOR

Precision mechanics;
Prototyping and small series;
Custom machining in various materials (aluminum, steel, Inconel, stainless steel, titanium) and complex parts with IT down to the micron (air-conditioned workshop);
Design and manufacture of press tools from 1800×1200 to 500T (follow-up tools, fine blanking, cambering, etc.) with on-site development and support;
Development and manufacture of cutting units for lathes and machining centers (very high-precision machining of internal and external splines) and tool holders;
Design and production of special machines;
2 integrated design offices (CATIA V5 and Solidworks software).
Aeronautics, defense, automotive, medical, food, fiber optics, nuclear, etc.
Equipped with high-performance machining equipment (NC and multifunction lathes, 3- and 5-axis CU with palletizing robots);
High-capacity grinding equipment (cylindrical, surface, and coordinate grinders);
Equipped with erosion machines (wire, die-sinking, and rapid drilling);
80T and 500T presses;
Metrological controls (measuring machine with continuous scanning);
MASTERCAM CAD/CAM;
CLIPPER ERP
