BUSINESS SECTOR

SYSNAV develops high-precision geolocation solutions resistant to GPS denial situations, based on magneto-inertial technology.

It addresses the indoor/outdoor geolocation needs of operators on industrial sites (protection of lone workers) and first responders (fire-fighters, soldiers).

Sysnav also supplies inertial navigation systems for vehicles (ground vehicles at airports, autonomous vehicles, mobile radar control vehicles).

Based in Vernon, France, SYSNAV has a headcount above 100 and holds about 20 patents.
