⚙️ BUSINESS SECTOR

Irradiation platform which aims to abandon the use of radioactive sources in favor of controlled irradiation.

In the heart of a regional network of scientific expertise, this technological platform ensures tailor-made support for your projects, from the qualification of R&D work to the industrialization process.

Treatment of surfaces by electrons beam (200 KEV – 3.5 MEV)

Qualification of electronic equipment under X irradiation, from component to system

Modification of the physico-chemical properties of the matter under irradiation

Wide ranges of energy and dose rate, in electrons or X -ray

Calibration of measuring instruments for ionizing radiation

Radiological samples (spectrometry, counting alpha/beta/gamma)

★ CERTIFICATIONS
