⚙️ BUSINESS SECTOR

Large-scale mechanics
Welded assemblies
Machining
Defense – Naval – Nuclear

For the past 15 years, HAG'TECH, based in Normandy, has been offering its operational expertise in mechanical machining and welded fabrication.

Specialized in unit and series machining, primarily of large-sized parts in both turning and milling, we serve multiple sectors. Our company is built on a strong commitment to meeting customer requirements and honoring our commitments — core values of our organization.

Our operations are supported by a high-performance quality management system (ISO 9001).

Machined materials:
Carbon and stainless steels
Inconel and Uranus
Aluminum, bronze, and copper alloys

Machining dimensions:
Milling: up to 8.5 meters in length
Turning: up to 3.1 meters in diameter

Maximum machine capacities:
Milling: 8500 x 4600 x 2000 mm – 5-axis
Turning: Ø 3200 x 2500 mm
Boring: 10000 x 3000 x 3000 mm – continuous 5-axis
