⚙️ BUSINESS SECTOR

Based in Normandy for over 50 years, the company specializes in the sale of equipments and electronic products for professionals, as well as the design and manufacturing of radio and microwave electronic systems and products from DC to 40GHz.

The company, accredited for the Research Tax Credit, is able of handling design and manufacturing, from specifications to the production of prototypes or pre-series, in the fields of industry, defense, and aerospace.

ICRF designs and develops, in France, standalone equipment (filters, couplers, modules, mixed digital/microwave boards, Front-End modules) or complete systems (such as amplifiers, switching matrices, test benches, radar building blocks, etc.).

The engineering teams also work on Maintenance in Operational Condition (MCO) and obsolescence management.
