⚙️ BUSINESS SECTOR

TEMECA is a French industrial company specialising in parts processing. Backed by decades of expertise, we support our customers from the co-design phase through to series production and toolmaking.

Certified ISO 9001:2015, EN 9100:2018 and soon IATF 16949, TEMECA guarantees a high level of quality and traceability.

Our offer is based around four areas: mass production of parts, design and manufacture of press tooling, urgent load shedding via our « SOS parts » service, and tool maintenance via our « tool clinic ». We have a wide range of machinery (presses up to 630 tonnes, spot welding, tribo-finishing, etc.) and precise inspection equipment (3D, profite projector, etc.)

Our expertise covers a wide range of sectors, including automotive, aeronautical, construction, electrical and sanitary engineering. With our expertise, agility and investment in digital tools (CAPM, CAD/CAM), we offer customised solutions with high added value.
